Administrivia

Joao & Rob

A. Administrivia

    1. Thanks to the scribes and stenographers

    2. Approval of minutes from RIPE 69

    3. Agenda bashing

    4. Selection of WG co-chair

B. The Role of Analytics in Routing, Network Performance and SDN

C. bgpdump2: A Tool for Full BGP Route Comparison

D. Latency IPv4 vs IPv6: Understanding the difference

E. RIPE NCC updates on Routing Information Service (RIS)

F. AOB

    1. Feedback from cross-registry authentication BoF

Charter update

- We agreed on a charter

- We decided to wait for the minutes to be published before signalling the RIPE NCC to update the text on the WG pages

- We dropped the ball

Chair rotation

The RIPE Routing Working Group should attempt to maintain two Chairpersons whenever possible. As a large part of the work of the Chairpersons is in creating an agenda for the Working Group meetings at RIPE meetings, these are generally appointed by consensus of those present at a Working Group meeting.

Each of the Chairpersons may periodically offer to stand down to allow new candidates to stand in their place. The Chairperson that wishes to stand down should announce that to the Working Group's mailing list two weeks before the meeting. Nominations for Chairpersons may be accepted up to the day before the Working Group's meeting.
