| restrict usage of RIPE-
NCC-RPSL-MNT |

Password is "RPSL"

Oops...

route: 12195

route6: 77

And much to my surprise I found that there are all kinds of objects which reference RIPE-NCC-RPSL-MNT with an "mnt-by:" attribute:

aut-num: 341

mntner: 51

as-set: 37

person: 40

route-set: 33

organisation: 5

Next?

- No longer allow this on any object:
 “mnt-by: RIPE-NCC-RPSL-MNT”
- Only allow it during the “create” process
- What to do with objects which would become unmaintained?
